Less Manual Work. More Business.

Every business has tasks that are repeated every day.

Data entry.

Customer follow-ups.

Marketing updates.

Project tracking.

Document checking.

Reports and monitoring.

These tasks take time — and time costs money.

KBS Business Automation & SaaS helps turn repetitive processes into **simple, automated workflows.**

What We Build

Retail Automation

Help your store attract customers, increase repeat purchases, and manage engagement with less manual effort.

WinWala

An automated loyalty and gamification platform for retailers.

Create rewards, spin wheels, stamp cards, VIP tiers, and customer engagement campaigns — all in one place.

[Explore WinWala →]

Marketing Automation

Create professional marketing content without depending on a designer for every post.

Creavo

A self-service creative platform that helps businesses create posters, social media content, greetings, and promotional designs in minutes.

[Explore Creavo →]

Website Automation

AI Website Builder

Create and launch professional websites faster with AI-powered website generation and automated deployment.

From creating pages to publishing updates, simplify the process of maintaining your digital presence.

[Build Your Website →]

Operations & Monitoring

Central Monitoring & SCADA

Monitor operational systems and critical processes from a centralized environment.

Get better visibility into what's happening, identify issues faster, and make informed decisions.

[Explore Monitoring Solutions →]

Project Management Automation

Bring projects, tasks, teams, deadlines, and progress into one structured system.

Reduce follow-ups and give everyone a clear view of project status.

[Improve Project Management →]

Engineering & Document Automation

AI Drawing Analysis

Review architectural and structural drawings faster with AI.

Our platform compares drawings, identifies differences, and helps generate RFIs — reducing hours of manual document review.

Why Automate Your Business?

Save Time

Let automation handle repetitive tasks so your team can focus on important decisions.

Reduce Errors

Automated processes reduce the mistakes that often happen during repetitive manual work.

Improve Visibility

Get clearer information about customers, operations, projects, and business performance.

Work Faster

Move tasks from manual processes to streamlined digital workflows.

Reduce Operational Costs

Spend less time and resources on repetitive work.

Scale With Ease

Build processes that can handle business growth without increasing manual effort at the same rate.

Built Around Real Business Problems

We don't build automation just because something can be automated.

We start with a simple question:

What is taking too much of your team's time?

Then we design a solution around the way your business actually works.

How It Works

01 — Find the Problem

We understand your current process and identify repetitive or time-consuming tasks.

02 — Design the Workflow

We map the process and identify where automation can create the biggest impact.

03 — Build the Solution

We develop a SaaS product, automation workflow, or custom system around your requirements.

04 — Connect & Launch

We integrate the solution with your existing tools and put it into operation.

05 — Improve

We monitor, learn, and continuously improve the system as your business grows.

[Automate Your Process →]

Our Approach

Simple to Adopt

Our tools are designed to be practical and easy for teams to start using.

Built for Real Operations

Every solution begins with a real business problem — not a list of unnecessary features.

Fast to See Value

We focus on automation that can deliver meaningful improvements without unnecessary complexity.

Built to Scale

Your processes change as your business grows. Our solutions are designed to grow with you.

Always Improving

We continue to refine our products and automation systems based on real-world usage.

One Group. Multiple Possibilities.

KBS Business Automation & SaaS is part of **KBS Group**, bringing experience across technology, fintech, retail, commerce, construction, and other business domains.

This cross-industry experience helps us identify automation opportunities that others may overlook.

What Can We Automate?

You don't need to know the technology.

Just tell us what your team does manually.

We can help you explore opportunities across:

Customer Engagement

Marketing

Sales

Operations

Project Management

Document Processing

Monitoring

Reporting

Data Management

Business Workflows
